Preface

The data contained in this bulletin represent the complete count of employment and wages for workers covered by unemployment insurance programs during 1996 in the 50 States and the District of Columbia. These data are the product of a Federal-State cooperative program known as the Covered Employment and Wages, or the ES-202, program. State employment security agencies compile the data from reports filed by employers and edit and process them by industry. The Bureau of Labor Statistics aggregates the data to national levels, by State and by industry.

This bulletin was prepared in the Office of Employment and Unemployment Statistics by Bernard J. Bell, Muriel K. Bennett, Mary Bowler, James M. Grounds, Robert J. Malin,

Teresa L. Morisi, Holly J. Olson, and Linda Wohlford of the Division of Occupational and Administrative Statistics. Data were prepared and processed by Barbara Athey, David Baggett, Angelo Figueroa, Sandra Logan, William Plaskie, Leonard Stockmann, Rex Tharp, and Jerry Trach in the Division of Business Establishment Systems, Robert Carlson, Chief.

Material in this publication is in the public domain and, with appropriate credit, may be reproduced without permission. This information is available to sensory impaired individuals upon request. Voice phone: (202) 606-7828; TDD phone (202) 606-5897; TDD message referral phone: 1-800-326-2577.

BLS regional offices and cooperating State agencies (inside back cover)

Introduction

This publication presents 1996 annual employment and wages data as defined in the 1987 *Standard Industrial Classification Manual* (SIC). These data pertain to workers covered by State unemployment insurance (UI) laws and Federal civilian workers covered by the Unemployment Compensation for Federal Employees (UCFE) program. The data for both private and public sector workers are reported to BLS by the employment security agencies of the 50 States and the District of Columbia as part of the Covered Employment and Wages, or ES-202, program.

Reports for this program are also received from the employment security agencies in Puerto Rico and the Virgin Islands, but their data are not included in this bulletin.

In 1996, employers in private industry provided State employment security agencies with quarterly tax reports on monthly employment, quarterly total and taxable wages, and contributions. These reports covered an average of 99.3 million wage and salary workers in approximately 6.9 million business establishments. Similar reports of monthly employment and quarterly wages were submitted by the Federal Government for 2.9 million civilian employees, by State governments for 4.2 million employees, and by local governments for 11.6 million employees. Covered employment reported by these sources reflected approximately 97.3 percent of wage and salary civilian employment and provided a virtual census (98 percent) of employees on nonfarm payrolls. The principal exclusions from UI and UCFE coverage

are cited in the appendix, "Characteristics and Uses of the Data," which follows the tables.

Data are presented by ownership, industry, and State and include the average number of establishments, annual average employment, total wages, and annual and average weekly wages per employee. National employment and wage totals are published for 11 broad industry divisions, 84 major industry groups, and almost all of the 1,005 4-digit SIC industries. Private sector data are presented by State for the divisions and 4-digit SIC industries. State, local, and Federal Government data are detailed for selected industries.

Beginning in 1991, employers reported employment and wages on an individual establishment basis. In prior years, a reporting unit concept which sometimes included more than one establishment was used. Thus, the establishment counts presented for 1991 forward may not be strictly comparable with reporting unit data in pre-1991 *Employment and Wages* publications. Employment data beginning in 1991 may also not be strictly comparable with historical data due to improved reporting procedures by some employers. (See the appendix for more information.)

The Bureau wishes to express its appreciation to employers for their continued cooperation in providing establishment-level data on the Multiple Worksite Report (MWR). The State employment security agencies that collect the data from employers also play a major role in this ongoing effort.

¹ Data for 1991 forward are not strictly comparable with prior years due to employer disaggregation of their employment and wages data to a finer level of detail. See the Appendix for a more detailed explanation of this change.

NOTE: Data for 1996 are preliminary and subject to revision. Detail may not add to totals due to rounding.

¹ Includes data for nonclassifiable establishments (SIC 8899), not shown separately.

² Includes data for 4-digit industries not shown separately. This exception to 4-digit industry data is made because adequate respondent records are not available on a uniform basis.

³ Most railroad employees are covered by unemployment programs under the Railroad

Retirement Act and thus not included in this bulletin.

nec = not elsewhere classified.

NOTE: Data for 1986 are preliminary and subject to revision. Detail may not add to totals due to rounding.

¹ Includes data for nonclassifiable establishments (SIC 9999), not shown separately.

² Includes data for 4-digit industries not shown separately. This exception to 4-digit industry data is made because adequate respondent records are not available on a uniform basis.

³ Most railroad employees are covered by unemployment programs under the Railroad Retirement Act and thus not included in this bulletin.

^{*} Indicates data do not meet BLS or State agency disclosure standards.

nec = not elsewhere classified.

Dash = zero establishments, employment, or wages.

NOTE: Data for 1996 are preliminary and subject to revision. Detail may not add to totals due to rounding.

¹ Includes establishments that reported no workers in March 1998.

² Includes data for nonclassifiable establishments, not shown separately.

NOTE: Data for 1998 are preliminary and subject to revision. Detail may not add to totals due to rounding.

Appendix. Characteristics and Uses of the Data

Characteristics

The statistics in this publication are compiled for the Covered Employment and Wages, or ES-202, program of the Bureau of Labor Statistics. They are derived from the quarterly tax reports submitted to State employment security agencies by employers subject to State unemployment insurance (UI) laws and from Federal agencies subject to the Unemployment Compensation for Federal Employees (UCFE) program. Each quarter, the State agencies edit and process the data and send the information to BLS in Washington, D.C.

Unemployment insurance laws and coverage

Initially, the Federal Unemployment Insurance Tax Act (1938) applied only to firms employing at least 8 persons for a minimum of 20 weeks in a calendar year and excluded certain categories of workers. Amendments to Title XV of the Social Security Act—the program of Unemployment Compensation for Federal Employees—extended coverage to Federal civilian employees effective January 1, 1955, and to workers in firms employing from four to seven workers effective January 1, 1956.

Federal legislation, effective January 1, 1972, extended coverage of State unemployment insurance systems in 28 States to firms employing 1 worker or more and expanded some of the statutory coverage provisions. The remaining States had previously extended coverage to these small employers. The 1972 legislation also brought coverage to employees of State hospitals, colleges, and universities.

The Federal Unemployment Compensation Amendments of 1976 incorporated major changes in State unemployment insurance laws effective January 1, 1978. Under the Federal Unemployment Tax Act (FUTA), States expanded coverage to include nearly all remaining State and local government employees, employees of nonprofit elementary and secondary schools, and certain domestic workers. Some States began implementing the amendments as early as 1976. The law also brought the Virgin Islands under the UI system.

The 1976 amendments covered agricultural labor if performed for an employer who, in any calendar quarter in the current or preceding calendar year, paid cash remuneration of \$20,000 or more for individuals employed in agricultural labor. The 1976 amendments also apply to employers who, on each of some 20 days in 20 different weeks during the

current or preceding calendar year, employed at least 10 individuals in agricultural labor.

Under a 1981 Supreme Court ruling, schools affiliated with religious organizations are not required to be covered under the UI system. Many of these schools, however, continue to cover their employees on a voluntary basis. Special provisions for railroad workers are made through the Railroad Unemployment Insurance Act. Data for those workers covered under the Railroad Retirement Board as well as the Unemployment Compensation for Ex-servicemen (UCX) programs are excluded from the tables in this publication.

Comparisons of data from one State to another should take into consideration the differences in UI laws between States. In addition, when UI-covered private industry employment data are compared directly with other employment series, the coverage exclusions should be taken into account.

Excluded from State UI coverage in 1996 were approximately:

Group	Number (in millions)
Wage and salary agricultural workers	0.2
Self-employed farmers	1.5
Self-employed nonagricultural workers	9.0
Domestic workers6
Unpaid family workers2
State and local government workers9
Railroad workers2

Certain types of nonprofit employers, such as religious organizations, are given a choice of coverage or exclusion in a number of States. Workers in these organizations are, therefore, reported to a limited degree. Details on coverage laws are provided in *Comparison of State Unemployment Insurance Laws*, available upon request from the Employment and Training Administration of the Department of Labor.

Industrial classification

Employment and wage data under the ES-202 program have been classified by industry since 1938. Industrial codes are assigned by State agencies to each establishment based on a description provided by the employer on a questionnaire. If a private or government employer conducts different activities at various establishments or installations, sepa-

rate industrial codes are assigned, to the extent possible, to each establishment.

The data presented in this bulletin are classified in accordance with the 1987 *Standard Industrial Classification Manual*. The manual defines 1,005 4-digit industries, 416 3-digit industries, 84 major industry groups, and 11 industry divisions. Of the 1,005 4-digit industries, 7 are not used in the coding of data because of difficulty in accurately identifying the specific industry of some employers.

In order to insure the highest possible quality of data, State employment security agencies verify and update, if necessary, the SIC, location, and ownership classifications of all establishments on a 3-year cycle. Government units in the public administration industry division, however, are verified less frequently. Changes in establishment classification codes resulting from the verification process were introduced with the data reported for first quarter 1996. Thus, some data, especially at the 4-digit SIC level, may not be strictly comparable with 1995 and earlier years.

Employment

In general, ES-202 monthly employment data represent the number of covered workers who worked during, or received pay for, the pay period which included the 12th day of the month. Virtually all workers are reported in the State where their jobs are physically located. In 1996, only about 6,000 of the 99.3 million covered employees in private industry were employed at worksites outside of the United States, Puerto Rico, and the Virgin Islands. These employees are reported in the States where their UI coverage is based and therefore included in the State totals in tables 3, 4, and 5.

Covered private industry employment includes most corporate officials, executives, supervisory personnel, professionals, clerical workers, wage earners, piece workers, and part-time workers. It excludes proprietors, the unincorporated self-employed, unpaid family members, and certain farm and domestic workers.

Persons on paid sick leave, paid holiday, paid vacation, and the like, are included. Persons on the payroll of more than one firm during the period are counted by each UI subject employer if they meet the employment definition noted above. Workers are counted even though, in the latter months of the year, their wages may not be subject to unemployment insurance tax. The employment count excludes workers who earned no wages during the entire applicable pay period because of work stoppages, temporary layoffs, illness, or unpaid vacations.

Employment data reported for Federal civilian employees are a by-product of the operations of State employment security agencies in administering the provisions of Title XV of the Social Security Act—the program of Unemployment Compensation for Federal Employees. Federal employment data are based on reports of monthly employment and quarterly wages submitted each quarter to State agencies for all Federal installations with employees covered by the Act, except

for certain national security agencies, which are omitted for security reasons.

Employment for all Federal agencies, except the Department of Defense, for any given month is based on the number of persons who worked during or received pay for the pay period which included the 12th of the month. Installations of the Department of Defense include persons employed on the last workday of the month plus all intermittent employees—occasional workers who were employed at any time during the month.

Establishments and employment size

An establishment is an economic unit, such as a farm, mine, factory, or store, which produces goods or provides services. It is typically at a single physical location and engaged in one, or predominantly one, type of economic activity for which a single industrial classification may be applied. Occasionally, a single physical location encompasses two or more distinct and significant activities. Each activity is reported as a separate establishment if separate records are kept and the various activities are classified under different 4-digit SIC codes.

Most employers have only one establishment; thus, the establishment is the predominant reporting unit or statistical entity for reporting employment and wages data. Most employers who operate more than one establishment in a State file a Multiple Worksite Report (MWR) each quarter, in addition to their quarterly UI report. The MWR form is used to collect separate employment and wage data for each of the employer's establishments, which are not detailed on the UI report. Some very small multi-establishment employers do not file a Multiple Worksite Report. When the total employment in an employer's secondary establishments (all establishments other than the largest) is 10 or fewer, the employer will generally file a consolidated report for all establishments. Also, some employers either cannot or will not report at the establishment level and thus aggregate establishments into one consolidated unit, or possibly several units, though not at the establishment level.

Prior to 1991, employers provided covered employment and wages data on a "reporting unit" basis. Reporting unit data typically provided detail only for different county locations and/or industrial operations within a State. Nonstandard forms, similar in concept to the MWR and called the Statistical Supplement, were used by States to collect these county/industry data. Although reporting units usually were individual establishments, employers could provide a summary of their employment and wages data for multiple establishments conducting the same type of industrial activity within a county. For example, a fast-food business may submit a report covering all its operations before 1991 within a county; on the MWR, the employer reports employment and wages data for each individual location.

For government, the reporting unit is the installation: a single location at which a department, agency, or other gov-

ernment instrumentality has civilian employees. Federal agencies follow slightly different criteria than private employers when breaking down their reports by installation. They are permitted to combine as a single statewide unit (1) all installations with 10 workers or fewer and (2) all installations which have a combined total in the State of fewer than 50 workers. Also, when there are fewer than 25 workers in all secondary installations in a State, the secondary installations may be combined and reported with the major installation. Lastly, if a Federal agency has fewer than five employees in a State, the agency headquarters office (regional office, district office) serving each State may consolidate the employment and wages data for that State with the data reported to the State in which the headquarters is located. As a result of these reporting rules, the number of reporting units is always larger than the number of employers (or government agencies) but smaller than the number of actual establishments (or installations).

Data reported for first quarter 1996 are tabulated into size categories ranging from very small worksites size to those with 1,000 employees or more. The size category is determined by the establishment's March employment level. It is important to note that each establishment of a multi-establishment firm is tabulated separately into the appropriate size category. The total employment level of the reporting multi-establishment firm is not used in the size tabulation.

Wages

Total wages. Covered employers in most States report total compensation paid during the calendar quarter, regardless of when the services were performed. A few State laws, however, specify that wages be reported or based on when services are performed rather than when compensation is paid. Under most State laws or regulations, wages include bonuses, stock options, the cash value of meals and lodging, tips and other gratuities, and, in some States, employer contributions to certain deferred compensation plans such as 401(k) plans.

Covered employer contributions for old-age, survivors, disability insurance (OASDI), health insurance, unemployment insurance, workers' compensation, and private pension and welfare funds are not reported as wages. Employee contributions for the same purposes, however, as well as money withheld for income taxes, union dues, etc., are reported even though they are deducted from the worker's gross pay.

Wages of covered Federal workers represent the gross amount of all payrolls for all pay periods ending within the quarter. This includes cash allowances, the cash equivalent of any type of remuneration, severance pay, withholding taxes, and retirement deductions. Federal employee remuneration generally covers the same types of services as for workers in private industry. Depending on the method (cash or accrual basis) used by the Federal agency in preparing its quarterly summary balance, the gross amount of payrolls is either paid or payable.

Average wages. Average annual wages per employee for any given industry are computed by dividing total annual wages by annual average employment. A further division by 52 yields average weekly wages per employee. Summary data and percent changes were computed from unrounded data and may differ from those computed using data rounded to the nearest dollar. Annual pay data only approximate annual earnings because an individual may not be employed by the same employer all year or may work for more than one employer.

Average weekly or annual pay is affected by the ratio of full-time to part-time workers as well as the number of individuals in high-paying and low-paying occupations. When comparing average pay levels between States and industries, these factors should be taken into consideration. For example, industries characterized by high proportions of part-time workers will show average wage levels appreciably less than the weekly pay levels of regular full-time employees in these industries. The opposite effect characterizes industries with low proportions of part-time workers, or industries which typically schedule heavy weekend and overtime work. Average wage data also may be influenced by work stoppages, labor turnover, retroactive payments, seasonal factors, bonus payments, etc.

Disclosure restrictions

In accordance with BLS policy, data provided to the Bureau in confidence are not published and are used only for specified statistical purposes. BLS withholds publication of UI-covered employment and wage data for any industry level: (1) which consists of fewer than three UI accounts; or (2) in which a single UI account represents 80 percent or more of the industry's employment. A State also may request that data be withheld for any industry level for which the above criteria would not protect the identity of cooperating employers. Totals at the industry level for the States and the Nation include the nondisclosable data suppressed within the detailed tables. However, these totals cannot be used to reveal the suppressed data.

Imputed data

To reduce the effect of data excluded because of late reporting by covered private and government employers, State agencies impute employment and wages for such employers and include them in each quarterly report. Corrections to data which may be entered after a report is filed will include replacement of imputations with reported data to the extent available. Imputations are calculated at the individual establishment level, typically using historical data reported by the employer. Sometimes trends reported by employers in the same industry or information obtained from other sources are also used. If a report remains delinquent for more than one quarter and research shows that it is still active, the establishment will again be imputed.

Comparison of ES-202 covered employment data with other series

Current Employment Statistics program. BLS and the State employment security agencies cooperate in the operation of the Current Employment Statistics (CES), or BLS-790, program. In this program, the State agencies prepare the current employment estimates for the States and for many metropolitan labor market areas, while BLS prepares the monthly employment estimates for the Nation. CES estimates of employment, average weekly and hourly earnings, and average weekly hours are derived from an employer survey of approximately 390,000 nonfarm establishments, selected primarily from the ES-202 administrative records of UI-covered employers. The national and State industry CES estimates are then benchmarked annually to the ES-202 covered employment data. Supplemental sources are used in benchmarking industries with non-covered workers.

Current Population Survey. The Current Population Survey (CPS) is conducted monthly for BLS by the Bureau of the Census. CPS employment data are estimated from a survey of about 50,000 households, while ES-202 employment data are based on a universe of over 7 million covered employer establishments. The CPS counts employed persons, whereas the ES-202 program counts encumbered jobs during the reporting period. Consequently, the CPS includes those persons "with a job but not at work" who earn no wages—for example, workers on extended unpaid leave of absence. The ES-202 data, on the other hand, exclude unpaid workers. The ES-202 covered employment program counts separately each job held by multiple jobholders. The CPS counts such workers once, in the job at which they worked the greatest number of hours. The CPS counts employed persons at their place of residence; the ES-202 program counts jobs at the place of work. The CPS also differs from the ES-202 program in that it includes self-employed persons, unpaid family workers employed 15 hours or more during the survey period, and a greater proportion of agricultural and domestic workers. The CPS data exclude persons under 16 years old, while the ES-202 program counts all covered workers regardless of age.

Office of Personnel Management data. The Office of Personnel Management (OPM) publishes a statistical series on Federal employment and payrolls with information on employing agencies, types of positions and appointments, and characteristics of employees. Data on Federal employment covered by the UCFE series provide industry, local area, and monthly employment detail not available in the OPM series. These detailed UCFE data are not published, but are available from the Bureau of Labor Statistics upon request.

Both the UCFE and the OPM data exclude members of the Armed Forces, temporary emergency workers employed to cope with catastrophes, and officers and crew members of

some American vessels. The UCFE and the OPM data differ in coverage of workers. For example, the UCFE, but not the OPM, includes Department of Defense workers paid from nonappropriated funds, employees of county agricultural stabilization and conservation committees, State and area marketing committees, and the Agricultural Extension Service. The OPM, but not the UCFE, includes workers who are not U.S. citizens and who are employed outside the United States and its territories, workers paid on a contract or fee basis, paid patients or inmates of Federal homes, hospitals, or institutions, and student employees of Federal hospitals, clinics, and laboratories.

The two programs also differ in the payroll reference period. UCFE employment data, except for the Department of Defense, relate to the payroll period which includes the 12th day of the month. OPM data, however, relate to persons employed on the last workday of the month plus all intermittent employees.

County Business Patterns. Covered employment data collected through the ES-202 program differ from employment data published in the Census Bureau's *County Business Patterns* (CBP) in the following major areas:

- CBP data exclude administrative and auxiliary establishments from "operating" establishment data at the 4-digit SIC level and include these data at the industry division level only. ES-202 covered employment, on the other hand, includes data for these establishments at the 4-digit SIC level.
- CBP excludes agricultural production workers and household workers, some of whom are included in ES-202 covered employment data. CBP also excludes government installations, all of which are included in ES-202 covered employment.
- Every 5 years, data are collected for all multi-establishment firms within the scope of business and economic censuses and included in the CBP for that year. Annual updates for multi-establishment firms are obtained from the sample selected for the Company Organization Survey, and data for nonsample multi-establishment firms are estimated. Annual updates for single establishment firms come from the Internal Revenue Service and the Social Security Administration. ES-202 covered employment, on the other hand, includes establishment data collected from all active firms, single or multi-establishment, each quarter.

Uses of the data

The ES-202 covered employment and wages data are the most complete universe of monthly employment and quarterly wage information by 4-digit industry at the national, State, and county levels. They have broad economic signifi-

cance in evaluating labor market trends and major industry developments, in time series analyses, and industry comparisons.

ES-202 data are used by businesses and by public and private research organizations as one of the best sources of detailed employment and wage statistics for economic forecasting, industry and regional analysis, impact studies, and other uses.

The program provides data necessary to both the Employment and Training Administration of the U.S. Department of Labor and the State employment security agencies to administer the employment security program. The data accurately reflect the extent of coverage of the State unemployment insurance laws. They are used to measure UI revenues, national, State, and local area employment, and total and UI taxable wage trends. The information is also used as an input for actuarial studies, determination of employer UI tax experience ratings, and UI benefit levels. Research using ES-202 data helps ensure the solvency of the unemployment insurance trust funds. The ES-202 data are also used to compute State and national insured unemployment rates for workers covered by UI programs.

The ES-202 data are also important for a variety of other BLS programs. They serve, for example, as the basic source of benchmark information for employment by industry and by size of establishment in the Current Employment Statistics program (BLS-790) and the Occupational Employment Statistics program. The Unemployment Insurance Address File, created from ES-202 administrative records of UI-covered employers, serves as a sampling frame for BLS establishment surveys such as the Industry Wage Surveys, Area Wage Surveys, Occupational Employment Statistics Survey, and several other establishment-based statistical programs.

Additionally, the Bureau of Economic Analysis of the Department of Commerce uses ES-202 data as a base for developing the wage and salary component of personal income, which is instrumental in determining Federal allocation of program grants to State and local governments.

How to obtain publications and data

Prior editions of *Employment and Wages* are out of print, but file copies may be examined at the BLS Washington office. The publications for 1975 through 1982 are available on microfiche from the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, VA 22151. You may call (703) 487-4600 for information. When ordering, please mention the pertinent NTIS microfiche number as follows:

Employment and wages	NTIS microfiche number
1975	PB83151316
1976	PB81146029
1977	PB81146037
1978	PB82106964
1979	PB83151324
1980	PB84121607
1981	PB84121615
1982	PB84172600

County-level and historical machine-readable data are available from the BLS Washington office. The charge for this service varies according to the complexity and volume of the request. Please request data by mail from the Office of Employment and Unemployment Statistics, Bureau of Labor Statistics, U.S. Department of Labor, Washington, DC 20212. Include the name and telephone number of an individual the Bureau may contact if necessary.

Most State agencies have ES-202 covered employment and wages data for both the private and government sectors by county and for major labor market areas. Requests for these detailed data should be made directly to State agencies (listed on the inside back cover of this publication). Data for Puerto Rico and the Virgin Islands are also available and may be obtained from the employment security agency in those areas.
